Product Description

ATLAS JSV® 3200 2x4

Not your everyday UTV side-by-side, the Atlas is in a class by itself. From its cargo bed right down to pedal spacing optimized for work boots, everything about it is designed for the job site. And that’s why we call it a Job Site Vehicle or, JSV. It’s a smooth-riding, quick-moving, mass-hauling workhorse of a vehicle, with the class-leading payload and towing capacity to prove it.

A two-cylinder, 1000cc, OHC engine, stronger clutch, and smoother drivetrain tackle demanding job site conditions

The Atlas JSV’s fabricated all-steel cargo bed won’t buckle or bend. Dump cargo with the touch of a button and haul a fully loaded pallet, thanks to a generous 18 cubic feet of cargo space.

**Steel cargo bed available on 3400SD model only.*

A one-piece chassis and independent rear suspension offers rigidity in the toughest work environments.
