Walk behind trowel with 48" adjustable pitch blade and Honda engine.

With a trowel diameter of 48-inches, the models of the CT48 trowel range are ideal for finishing medium large areas. The trowels are optimally balanced, therefore they can be effortlessly controlled in the wide range of speeds. The transmission brake, electronic safety switch and engine speed sensor offer additional triple protection for the user. In an emergency situation the device will simply switch off and the handle will come to a stand-still after no more than a three-quarter turn. Furthermore, the unit will only start if the throttle lever is set to zero. This prevents an inadvertent rotation of the handle on start-up.
