1 man hydraulic auger. Used with 8"x36", 10"x36", and 12"x36" auger bits.

Features:

- The use of hydraulics allows the HD99 to have variable auger speed and reverse which is very useful if the auger gets stuck.
- designed to take the load off of the operator by being almost perfectly balanced with an 8-inch auger attached, and the right angle design eliminates torque to the operator.
- The drilling head also pivots from side to side for drilling on uneven terrain.
- Large highway rated tires make the HD99 easy to maneuver around the job site
- locking mechanism on the digging head that allows the auger to be held up and out of the way for moving the machine around the job without having to disconnect the auger
